Programming languages:

JavaScript, Ruby, SQL, C++

Technologies and Frameworks:

AngularJS, ExpressJS, Ruby on Rails, jQuery, AJAX, HTML/CSS, postgresql, APIs, Sinatra, experience with GitHub and Heroku, SQL Server, MongoDB

Web Development Experience: Projects:

connect-four-in-a-row.herokuapp.com

Connect 4 is a 2 player game where each player in his turn drops one of his checkers down any of the slots in the top of the grid. The play alternates until one of the players gets four checkers of his color in a row; he is the winner. Implemented using Javascript, jQuery.

animalshelter.herokuapp.com

An application that allows people to put animals for adoption and file an application for adoption

- Technologies used: Ruby on Rails and PostgreSQL.
- Rendered editable pages of available for adoption animals using RESTful routes
- Implemented administrator role with permission to edit/delete any page as well as update animal status.
- Integrated user authentication using sessions and bcrypt

Qcards (http://159.203.92.96:3000/)

As I part of a group developed an application to reduce paper consumption in business world. Qcards helps people to avoid using paper business cards by encoding the business card information into sharable QR code.

- Technologies used: ExpressJS, NodeJS, MongoDB,
- Implemented persistent sessions using express-session
- Used bcrypt to hash passwords
- QR code API was used to encode/decode to QR codes

shishkina.herokuapp.com

Personal website, built using Bootstrap

Global Potential

NYC, July 2015 – present

Salesforce Coordinator

- Design and develop new functionality based on business requirements
- Writing/updating queries to meet business requirements
- Maintenance/creation of custom objects, fields, validations, data-loads, etc.
- Data migration, mass upload of documents using Jitterbit
